ABRO-vars

```
scchart ABRO {  
  input bool A, B, R  
  output bool O  
  
  initial state ABO {  
    entry do O = false  
  
    initial state WaitAB {  
      region:  
  
      initial state wA  
      if A go to dA  
  
      final state dA  
  
      region:  
  
      initial state wB  
      if B go to dB  
  
      final state dB  
    }  
    do O = true join to done  
  
    state done  
  }  
  if R abort to ABO  
}
```
