

Discontinued Projects

On this site you'll find older projects and plugins listed that are not under active development and no longer supported. They may have been part of earlier releases of KIELER but are not part of the current or future releases. Nevertheless some projects may eventually recover from this state-on-hold and may be continued or taken into consideration for future projects and developments at some point in time. Probably not, though.

KLay Debug View

Removed on April 8th, 2020 – Git commit 58b17b5b6285644342eccc1cc2bf8e80907f40d2

Removed plugins:

- de.cau.cs.kieler.klay.debugview

This debug view was used to inspect intermediate results produced by what was then called KLay Layered. ELK's new logging infrastructure has superseded this view's functionality.

All Remaining Tests

Removed on March 12th, 2020 – Git commit b03ac594329790b007f341327927423de21fd6f5

- de.cau.cs.kieler.kgraph.text.test
- de.cau.cs.kieler.klay.test
- de.cau.cs.kieler.pragmatics.test.common

All of these have either been moved to or superseded in ELK or have problems so big that it's not worth fixing them. The tests in the GrAna test plug-in may be worth resurrecting once GrAna is moved to ELK.
